

# Lab 2 notes

- Copy spreadsheets to hard drive of computer; computer may not “trust” content from network or USB drives.
  - copy back to thumb drive when finished
- Select medium security for macros
- To edit macros with Office Vista you will need to install Developer (it should be on the hard drive)
- For macros from Lab 2, start from row 5 (as in instructions) not row 6
  - do not need to re-do macro, can edit it to replace H6 with H5
